Metallurgical and Materials Engineering

Degrees Offered

- Master of Engineering (Metallurgical and Materials Engineering)
- Master of Science (Metallurgical and Materials Engineering)
- Doctor of Philosophy (Metallurgical and Materials Engineering)

Program Description

The program of study for the Master or Doctor of Philosophy degrees in Metallurgical and Materials Engineering is selected by the student in consultation with her or his advisor, and with the approval of the Thesis Committee. The program can be tailored within the framework of the regulations of the Graduate School to match the student’s interests while maintaining the main theme of materials engineering and processing. There are three areas of specialization within the Department:

- Physical and Mechanical Metallurgy;
- Physicochemical Processing of Materials; and,
- Ceramic Engineering.

The Department is home to six research centers:

- Advanced Coatings and Surface Engineering Laboratory (ACSEL);
- Advanced Steel Processing and Products Research Center (ASPPRC);
- Center for Advanced Non Ferrous Structural Alloys (CANFSA)
- Center for Welding Joining, and Coatings Research (CWJCR);
- Colorado Center for Advanced Ceramics (CCAC); and,
- Kroll Institute for Extractive Metallurgy (KIEM).

The Nuclear Science and Engineering Center (NuSEC) also operates closely with the Department.

A Graduate Certificate is offered by each Department Center – the requirements for the Graduate Certificate are:

1. Be admitted to MME Graduate Certificate Program upon the recommendation of the MME Department.
2. Complete a total of 12 hours of course credits of which only 3 credit hours can be at the 400 level.

The specific courses to be taken are determined by the Graduate Advisor in the Department Center selected by the candidate. A cumulative grade point average of B or better must be maintained while completing these requirements.

Degree Program Requirements

The program requirements for the three graduate degrees offered by the Department are listed below:

Master of Engineering Degree

Requirements: A minimum total of 30.0 credit hours consisting of:

1. A minimum of 24.0 credit hours of approved course work and 3.0 hours of either a three credit hour research based Independent Study (MTGN599) or a designated design course (minimum of 3 credit hours) and graduate seminar enrollment during duration of program (up to a maximum of 1 credit hour).
2. The designated design courses include the following courses: MTGN114, MTGN445, MTGN450, MTGN461, MTGN464, MTGN466, MTGN475/477, MTGN549, MTGN564, MTGN560. Alternative courses can be substituted with approval from the advisor and department head.

Restrictions:

1. Only three (3) credit hours of independent course work, e.g. MTGN599, may be applied toward the degree.
2. A maximum of nine (9) credit hours of approved 400-level course work may be applied toward the degree.
3. Courses taken to remove deficiencies may not be applied toward the degree.

The Master of Engineering Degree can also be obtained as part of the combined undergraduate/graduate degree program. See the Physics section of the undergraduate bulletin for more details.

Master of Science Degree

Requirements: A minimum total of 30.0 credit hours, consisting of:

1. A minimum of 18.0 credit hours of approved course work and a minimum of 6.0 hours of graduate research-credits listed under MTGN707.
2. Approval of all courses by the Thesis Committee and the Department Head. (Thesis Committee: consisting of 3 or more members, including the advisor and at least 1 additional member from the Metallurgical and Materials Engineering Department.)
3. Submittal and successful oral defense of a thesis before a Thesis Committee. The thesis must present the results of original scientific research or development.

Restrictions:

1. Only three (3) credit hours of independent course work, e.g. MTGN599, may be applied toward the degree.
2. A maximum of nine (9) credit hours of approved 400-level course work may be applied toward the degree.
3. Courses taken to remove deficiencies may not be applied toward the degree.

Doctor of Philosophy Degree

Requirements: A minimum total of 72.0 credit hours consisting of:

1. A minimum of 36.0 credit hours of approved course work and a minimum of 24.0 hours of research-credits (MTGN707). Credit hours previously earned for a Master’s degree may be applied, subject to approval, toward the Doctoral degree provided that the Master’s degree was in Metallurgical and Materials Engineering or a similar field. At least 21.0 credit hours of approved course work must be taken at the Colorado School of Mines.
2. All courses and any applicable Master’s degree credit-hours must be approved by the Thesis Committee and the Department Head (Thesis Committee consisting of: 5 or more members, including the advisor, at least 2 additional members from the Metallurgical and Materials Engineering Department, and at least 1 member from outside the Department.)
5. Presentation of a Progress Report on their Research Project to the Thesis Committee; this presentation is usually 6 months after successfully completing the Q.P. Examinations and no fewer than 6 weeks before the Defense of Thesis.
6. Submittal and successful oral-defense of a thesis before the Thesis Committee. The thesis must present the results of original scientific research or development.

Restrictions:
1. Only six (6) credit hours of independent course work, e.g. MTGN599, may be applied toward the degree.
2. A maximum of nine (9) credit hours of approved 400-level course work may be applied toward the degree.
3. Courses taken to remove deficiencies may not be applied toward the degree.

Prerequisites
The entering graduate-student in the Department of Metallurgical and Materials Engineering must have completed an undergraduate program equivalent to that required for the B.S. degree in: Metallurgical and Materials Engineering, Materials Science or a related field. This undergraduate program should have included a background in science fundamentals and engineering principles. A student, who possesses this background but has not taken specific undergraduate courses in Metallurgical and Materials Engineering, will be allowed to rectify these course deficiencies at the beginning of their program of study.

Fields of Research

Ceramic Research
- Ceramic processing
- Ceramic-metal composites
- Functional materials
- Ion implantation
- Modeling of ceramic processing
- Solid oxide fuel cell materials and membranes
- Transparent conducting oxides

Coatings Research
- Chemical vapor deposition
- Coating materials, films and applications
- Epitaxial growth
- Interfacial science
- Physical vapor deposition
- Surface mechanics
- Surface physics
- Tribology of thin films and coatings

Extractive and Mineral Processing Research
- Chemical and physical processing of materials
- Electrometallurgy
- Hydrometallurgy

- Mineral processing
- Pyrometallurgy
- Recycling and recovery of materials
- Thermal plasma processing

Nonferrous Research
- Aluminum alloys
- High entropy alloys
- Magnesium alloys
- Nonferrous structural alloys
- Shape memory alloys
- Superalloys
- Titanium alloys

Polymers and Biomaterials Research
- Advanced polymer membranes and thin films
- Biopolymers
- Bio-mimetic and bio-inspired materials engineering
- Calcium phosphate based ceramics
- Drug delivery
- Failure of medical devices
- Interfaces between materials and tissue
- Living/controlled polymerization
- Organic-inorganic hybrid materials
- Porous structured materials
- Self- and directed-assembly
- Structural medical alloys
- Tissue as a composite material

Steel Research
- Advanced high strength steels
- Advanced steel coatings
- Carburized steels
- Deformation behavior of steels
- Fatigue behavior of steels
- Microalloyed steels
- Nickel-based steels
- Quench-based steels
- Quench and partitioned steels
- Plate steels
- Sheet steels

Welding and Joining Research
- Brazing of ultra wide gaps
- Explosive processing of materials
- Laser welding and processing
- Levitation for kinetics and surface tension evaluation
- Materials joining processes
- Pyrochemical kinetics studies using levitation
- Underwater and under oil welding
- Welding and joining science
- Welding rod development
- Welding stress management
- Weld metallurgy
Weld wire development

Nuclear Materials Research
- Nuclear materials characterization
- Nuclear materials processing
- Nuclear materials properties

Experimental Methods
- 3D atom probe tomography
- Atomic force microscopy
- Computer modeling and simulation
- Electron microscopy
- Mathematical modeling of material processes
- Nanoindentation
- Non-destructive evaluation
- X-ray diffraction

Other Research Areas
- Combustion synthesis
- Corrosion science and engineering
- Failure analysis
- Mechanical metallurgy
- Phase transformation and mechanism of microstructural change
- Physical metallurgy
- Reactive metals properties
- Strengthening mechanisms
- Structure-property relationships

MTGN505  CRYSTALLOGRAPHY AND DIFFRACTION  3.0
MTGN511  SPECIAL METALLURGICAL AND MATERIALS ENGINEERING PROBLEMS  1-3
MTGN512  SPECIAL METALLURGICAL AND MATERIALS ENGINEERING PROBLEMS  1-3
MTGN514  DEFECT CHEMISTRY AND TRANSPORT PROCESSES IN CERAMIC SYSTEMS  3.0
MTGN516  MICROSTRUCTURE OF CERAMIC SYSTEMS  3.0
MTGN517  REFRACTORIES  3.0
MTGN518  PHASE EQUILIBRIA IN CERAMIC SYSTEMS  3.0
MTGN523  APPLIED SURFACE AND SOLUTION CHEMISTRY  3.0
MTGN526  GEL SCIENCE AND TECHNOLOGY  3.0
MTGN527  SOLID WASTE MINIMIZATION AND RECYCLING  3.0
MTGN528  EXTRACTIVE METALLURGY OF COPPER, GOLD AND SILVER  3.0
MTGN529  METALLURGICAL ENVIRONMENT  3.0
MTGN530  ADVANCED IRON AND STEELMAKING  3.0
MTGN531  THERMODYNAMICS OF METALLURGICAL AND MATERIALS PROCESSING  3.0
MTGN532  PARTICULATE MATERIAL PROCESSING I - COMMINUTION AND PHYSICAL SEPARATIONS  3.0
MTGN533  PARTICULATE MATERIAL PROCESSING II - APPLIED SEPARATIONS  3.0
MTGN534  CASE STUDIES IN PROCESS DEVELOPMENT  3.0
MTGN535  PYROMETALLURGICAL PROCESSES  3.0
MTGN536  OPTIMIZATION AND CONTROL OF METALLURGICAL SYSTEMS  3.0
MTGN537  ELECTROMETALLURGY  3.0
MTGN538  HYDROMETALLURGY  3.0
MTGN539  PRINCIPLES OF MATERIALS PROCESSING REACTOR DESIGN  3.0
MTGN541  INTRODUCTORY PHYSICS OF METALS  3.0
MTGN542  ALLOYING THEORY, STRUCTURE, AND PHASE STABILITY  3.0
MTGN543  THEORY OF DISLOCATIONS  3.0
MTGN544  FORGING AND DEFORMATION MODELING  3.0
MTGN545  FATIGUE AND FRACTURE  3.0
MTGN546  CREEP AND HIGH TEMPERATURE MATERIALS  3.0
MTGN547  PHASE EQUILIBRIA IN MATERIALS SYSTEMS  3.0
MTGN548  TRANSFORMATIONS IN METALS  3.0
MTGN549  CURRENT DEVELOPMENTS IN FERROUS ALLOYS  3.0
MTGN550  ADVANCED CORROSION ENGINEERING  3.0
MTGN552  INORGANIC MATRIX COMPOSITES  3.0
MTGN553  STRENGTHENING MECHANISMS  3.0
MTGN554  OXIDATION OF METALS  3.0
MTGN555  SOLID STATE THERMODYNAMICS  3.0
MTGN556  TRANSPORT IN SOLIDS  3.0
MTGN557  SOLIDIFICATION  3.0
MTGN558  ANALYSIS OF METALLURGICAL FAILURES  3.0
MTGN559  PHYSICAL METALLURGY OF ALLOYS FOR AEROSPACE  3.0
MTGN560  ADVANCED FORGING AND FORMING  3.0
MTGN565  MECHANICAL PROPERTIES OF CERAMICS AND COMPOSITES  3.0
MTGN569  FUEL CELL SCIENCE AND TECHNOLOGY  3.0
MTGN570  BIOCOMPATIBILITY OF MATERIALS  3.0
MTGN571  METALLURGICAL AND MATERIALS ENGINEERING LABORATORY  1-3
MTGN572  BIOMATERIALS  3.0
MTGN580  ADVANCED WELDING METALLURGY  3.0
MTGN581  WELDING HEAT SOURCES AND INTERACTIVE CONTROLS  3.0
MTGN582  MECHANICAL PROPERTIES OF WELDED JOINTS  3.0
MTGN583  PRINCIPLES OF NON-DESTRUCTIVE TESTING AND EVALUATION  3.0
MTGN584  NON-FUSION JOINING PROCESSES  3.0
MTGN586  DESIGN OF WELDED STRUCTURES AND ASSEMBLIES  3.0
MTGN587  PHYSICAL PHENOMENA OF WELDING AND JOINING PROCESSES  3.0
MTGN591  PHYSICAL PHENOMENA OF COATING PROCESSES  3.0
MTGN593  NUCLEAR MATERIALS SCIENCE AND ENGINEERING  3.0
MTGN605  ADVANCED TRANSMISSION ELECTRON MICROSCOPY  2.0
MTGN605L  ADVANCED TRANSMISSION ELECTRON MICROSCOPY LABORATORY  1.0
Professors
Angus Rockett, Department Head
Corby G. Anderson, Harrison Western Professor
Michael J. Kaufman, Dean of CASE
Stephen Liu, American Bureau of Shipping Endowed Chair Professor of Metallurgical and Materials Engineering
Ryan O’Hayre, Program Director of Material Science
Ivar E. Reimanis, Professor, Herman F. Coors Distinguished Professor of Ceramics
Sridhar Seetharaman
John G. Speer, John Henry Moore Distinguished Professor of Metallurgical and Materials Engineering
Patrick R. Taylor, George S. Ansell Distinguished Professor of Chemical Metallurgy

Associate Professors
Amy Clarke
Kip O. Findley
Brian Gorman
Jeffrey C. King
Corinne E. Packard
Steven W. Thompson

Assistant Professors
Geoff L. Brennecka
Kester Clarke, FIERF Professor
Emmanuel De Moor
Vladan Stevanovic
Zhenzhen Yu

Teaching Professor
Gerald Bourne, Assistant Department Head

Research Professors
Richard K. Ahrenkiel
William (Grover) Coors
Ivan Cornejo
Robert Field
Terry Lowe
Stephen Midson
Paul Queneau
D. (Erik) Spiller
James C. Williams

Research Associate Professors
Robert Cryderman
Carole Graas
Juan Carlos Madeni
Brock O’Kelly
Edgar Vidal
Gary Zito

Research Assistant Professors
David Diercks
Judith C. Gomez
Michael Sanders

Professors Emeriti
Glen R. Edwards, University Professor Emeritus
John P. Hager, University Professor Emeritus
George Krauss, University Professor Emeritus
Gerard P. Martins, Professor Emeritus
David K. Matlock, University Professor Emeritus
Brajendra Mishra, University Professor Emeritus
John J. Moore, Professor Emeritus
David L. Olson, University Professor Emeritus
Dennis W. Readey, University Professor Emeritus
Chester J. Van Tyne, Professor Emeritus

Associate Professors Emeriti
Gerald L. DePoorter

Robert H. Frost
