Program Description
The interdisciplinary online program in Geographic Information System (GIS) and GeoInformatics focus on the applications of GIS technology, hands-on geospatial training, multi-criteria decision making, advanced application and quantitative analysis aspects of GIS and Remote Sensing (RS), and are directly aligned with Colorado School of Mines’ focuses and strengths on Earth, Energy and Environment. Our programs will enhance students’ quantitative geospatial data analysis skills, help the students get ahead of the technology curve, and enable professionals to advance their careers.

Certificate and Degree Requirements
We offer four graduate certificates and a non-thesis Master’s degree. The courses taken for certificate degrees can be used towards the Master’s degree.

The Graduate Certificate Program in GIS & GeoInformatics outlined below may be completed by individuals already holding undergraduate or advanced degrees or as a combined degree program by individuals already matriculated as undergraduate students at The Colorado School of Mines. The program is comprised of:
