Humanitarian Engineering

Degrees

- Graduate Certificate in Humanitarian Engineering and Science

Program Description

The MS degrees in Humanitarian Engineering and Science (HES) are a professional MS (non-thesis) and a thesis-based MS. These degrees are targeted to recent graduates or mid-career professionals with a BS in science and engineering who are interested in careers, research opportunities, and/or acquiring skills that will help them work effectively with communities. The degrees include a core HES curriculum plus an approved track of related courses in a science or engineering discipline.

The HES graduate certificate is designed for professionals seeking to attend school part-time or students who are seeking degrees in other departments at Mines but still desire graduate training in humanitarian engineering and science. It consists of four courses.

In both the master’s degrees and graduate certificate, a unique mix of social science, applied science, and engineering perspectives prepares students to apply knowledge about the earth to promote more sustainable and just uses of water, energy, and other earth resources and to understand and mitigate potential hazards.

To achieve the Master of Science (MS) degree, students may elect the Non-Thesis option, based exclusively upon coursework and a practicum, or the Thesis option. The thesis option is comprised of coursework in combination with individual research performed under the guidance of two faculty advisors and presented in a written thesis approved by the student’s committee. HES students have academic advisors from both the Engineering, Design & Society Division and their disciplinary track (Environmental Engineering, Geological Engineering, or Geophysics). The thesis-based MS usually takes two years to complete, while the non-thesis MS can often be completed in one year.

For more information on program curriculum please refer to the HES website: https://humanitarian.mines.edu/mshes/.

Program Requirements

The MS degrees in Humanitarian Engineering and Science (HES) are a professional MS (non-thesis) and a thesis-based MS. These degrees are targeted to recent graduates or mid-career professionals with a BS in science and engineering who are interested in careers, research opportunities, and/or acquiring skills that will help them work effectively with communities. The degrees include a core HES curriculum plus an approved track of related courses in a science or engineering discipline. A unique mix of social science, applied science, and engineering perspectives prepares students to apply knowledge about the earth to promote more sustainable and just uses of water, energy, and other earth resources and to understand and mitigate potential hazards.

Master of Science (Non-Thesis)
To obtain the 30 credits, students must satisfy the following program requirements: (1) 12 credits of required HES courses; (2) 3 credits of elective HES courses approved by Engineering, Design & Society; and (3) 15 credits of courses (500+ level) approved by the affiliated Department.

Disciplinary Tracks

**Track 1: Geophysics (GPGN) (15 credits):**

Degree candidates should have an undergraduate degree in geophysics, physics, quantitative earth sciences and engineering, or equivalent coursework. In addition, candidates will need to complete necessary prerequisite courses for the graduate courses.

- **GPGN577** HUMANITARIAN GEOSCIENCE 3.0
- **GPGN533** GEOPHYSICAL DATA INTEGRATION & GEOSTATISTICS 3.0
- **GPGN570** APPLICATIONS OF SATELLITE REMOTE SENSING 3.0
- **GPGN574** ADVANCED HYDROGEOPHYSICS 3.0
- **ELECTIVES** 3 credits of approved 500-level GPGN electives 3.0

Approved GPGN Electives List:

- **GPGN509** PHYSICAL AND CHEMICAL PROPERTIES AND PROCESSES IN ROCK, SOILS, AND FLUIDS 3.0
- **GPGN511** ADVANCED GRAVITY AND MAGNETIC METHODS 3.0
- **GPGN520** ELECTRICAL AND ELECTROMAGNETIC EXPLORATION 3.0
- **GPGN530** APPLIED GEOPHYSICS 3.0
- **GPGN555** EARTHQUAKE SEISMOLOGY 3.0
- **GPGN561** SEISMIC DATA PROCESSING I 3.0
- **GPGN605** INVERSION THEORY 3.0
- Other GPGN 500- or 600-level courses as approved by the GPGN program coordinator

**Track 2: Environmental Engineering (CEEN) (15 credits):**

A BS degree in a science or engineering discipline is required. Pre-requisites include two semesters of college calculus, one semester of college physics, two semesters of college chemistry, and one semester of college statistics.

- **CEEN550** PRINCIPLES OF ENVIRONMENTAL CHEMISTRY 3.0
- **GPGN577** HUMANITARIAN GEOSCIENCE 3.0
- **CEEN580** CHEMICAL FATE AND TRANSPORT IN THE ENVIRONMENT 3.0

One of the Following:

- **CEEN560** MOLECULAR MICROBIAL ECOLOGY AND THE ENVIRONMENT 3.0
- **CEEN562** ENVIRONMENTAL GEOMICROBIOLOGY 3.0
- **CEEN566** MICROBIAL PROCESSES, ANALYSIS AND MODELING 3.0

One of the Following:

- **CEEN472** ONSITE WATER RECLAMATION AND REUSE 3.0
- **CEEN570** WATER AND WASTEWATER TREATMENT 3.0

Approved CEEN Electives List:

The following courses can be substituted for required track courses if incoming students have already taken some of the required courses:

- **CEEN477** SUSTAINABLE ENGINEERING DESIGN 3.0
- **CEEN479** AIR POLLUTION 3.0
- **CEEN501** LIFE CYCLE ASSESSMENT 3.0
- **CEEN/MNGN556** MINING AND THE ENVIRONMENT 3.0
- **CEEN573** RECLAMATION OF DISTURBED LANDS 3.0
- **CEEN575** HAZARDOUS WASTE SITE REMEDIATION 3.0
- **CEEN576** POLLUTION PREVENTION: FUNDAMENTALS AND PRACTICE 3.0
- **CEEN581** WATERSHED SYSTEMS MODELING 3.0
- **CEEN592** ENVIRONMENTAL LAW 3.0
- Other CEEN 500- or 600-level courses as approved by the CEEN Program Coordinator

**Track 3: Geological Engineering (GEGN) (15 credits):**

Degree candidates should have an undergraduate degree in engineering or the equivalent coursework. In addition, candidates will need to complete necessary prerequisite courses for the graduate courses, including engineering geology, ground-water engineering, soil mechanics, and rock mechanics.

- **GEGN532** GEOLOGICAL DATA ANALYSIS 3.0
- **GPGN577** HUMANITARIAN GEOSCIENCE 3.0

Candidates must also take at least three of the following courses. The student and the instructor will work together to develop humanitarian themes in the project assignments within each course.

- **GEGN563** APPLIED NUMERICAL MODELLING FOR GEOMECHANICS 3.0
- **GEGN570** CASE HISTORIES IN GEOLOGICAL ENGINEERING AND HYDROGEOLOGY 3.0
- **GEGN573** GEOLOGICAL ENGINEERING SITE INVESTIGATION 3.0
- **GEGN575** APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS 3.0
- **GEGN580** APPLIED REMOTE SENSING FOR GEOENGINEERING AND GEOSCIENCES 3.0
- **GEGN671** LANDSLIDES: INVESTIGATION, ANALYSIS & MITIGATION 3.0
- **GEGN673** ADVANCED GEOLOGICAL ENGINEERING DESIGN 3.0

**Master of Science (Thesis)**

To obtain the 30 credits, students must satisfy the following program requirements: (1) 9 credits of required HES courses; (2) 3 credits of elective HES classes approved by Engineering, Design & Society; (3) 12 credits of approved Disciplinary Track classes (500+ level); and (4) 6 credits of MS thesis research on a thesis topic approved by HES faculty in the Engineering, Design, & Society Division and the affiliated disciplinary track.

**HES Courses (12 credits in addition to the 6 credit hour thesis):**

- **EDNS577** ADVANCED ENGINEERING AND SUSTAINABLE COMMUNITY DEVELOPMENT 3.0
- **EDNS479** COMMUNITY-BASED RESEARCH 3.0
EDNS590    RISKS IN HUMANITARIAN ENGINEERING AND SCIENCE  3.0

ELECTIVES  3 credits of approved HES electives from list above  3.0

Disciplinary Tracks

Track 1: Geophysics (GPGN) Courses and Thesis (18 credits):

GPGN577    HUMANITARIAN GEOSCIENCE  3.0
GPGN533    GEOPHYSICAL DATA INTEGRATION & GEOSTATISTICS  3.0
GPGN570    APPLICATIONS OF SATELLITE REMOTE SENSING  3.0
GPGN574    ADVANCED HYDROGEOPHYSICS  3.0
GPGN707    GRADUATE THESIS / DISSERTATION RESEARCH CREDIT  6.0

Track 2: Environmental Engineering (CEEN) Courses and Thesis (18 credits):

GPGN577    HUMANITARIAN GEOSCIENCE  3.0
CEEN707    GRADUATE THESIS / DISSERTATION RESEARCH CREDIT  1-15

Choose three of the following four options:

CEEN550    PRINCIPLES OF ENVIRONMENTAL CHEMISTRY  3.0
CEEN580    CHEMICAL FATE AND TRANSPORT IN THE ENVIRONMENT  3.0

One of the following:

CEEN560    MOLECULAR MICROBIAL ECOLOGY AND THE ENVIRONMENT  3.0
CEEN562    ENVIRONMENTAL GEOMICROBIOLOGY
CEEN566    MICROBIAL PROCESSES, ANALYSIS AND MODELING

One of the following:

CEEN472    ONSITE WATER RECLAMATION AND REUSE
CEEN570    WATER AND WASTEWATER TREATMENT

Approved CEEN Electives:
The courses listed in the Approved CEEN Electives List above can be substituted for required track courses if incoming students have already taken some of the required courses.

Track 3: Geological Engineering Courses and Thesis (18 credits):

GPGN577    HUMANITARIAN GEOSCIENCE  3.0
GEGN707    GRADUATE THESIS / DISSERTATION RESEARCH CREDIT  1-15

Students must take two of the following courses:

GEGN563    APPLIED NUMERICAL MODELLING FOR GEOMECHANICS  3.0
GEGN570    CASE HISTORIES IN GEOLOGICAL ENGINEERING AND HYDROGEOLOGY  3.0
GEGN573    GEOLOGICAL ENGINEERING SITE INVESTIGATION  3.0

Mines’ Combined Undergraduate / Graduate Degree Program

Students enrolled in Mines’ combined undergraduate/graduate program (meaning uninterrupted registration from the time the student earns a Mines undergraduate degree to the time the student begins a Mines graduate degree) may double count up to six hours of credits which were used in fulfilling the requirements of their undergraduate degree at Mines, towards their graduate program. Any courses that count towards the graduate degree requirements as either “Required Coursework” or “Elective Coursework”, as defined above, may be used for the purposes of double-counting at the discretion of the advisor (MS Non-Thesis) or thesis committee (MS Thesis or PhD.). These courses must have been passed with a “B-” or better and meet all other University, Department, Division, and Program requirements for graduate credit.

Graduate Certificate

The HES certificate is an online or residential program designed for working professionals as well as graduate students who are enrolled in other degrees at Mines but wish to gain knowledge in humanitarian engineering and science. To obtain a graduate certificate, students must complete a minimum of 9 credit hours of the following courses. Students may not double-count courses from their undergraduate degrees. Students who have already taken one of the classes as undergraduates must find a suitable replacement, to be approved by the HES Director. Students are encouraged to take 12 credit hours of coursework if possible.

Required HES certificate courses (9 credits):

EDNS577    ADVANCED ENGINEERING AND SUSTAINABLE COMMUNITY DEVELOPMENT  3.0
EDNS479    COMMUNITY-BASED RESEARCH  3.0
EDNS590    RISKS IN HUMANITARIAN ENGINEERING AND SCIENCE  3.0

Courses

EDNS577. ADVANCED ENGINEERING AND SUSTAINABLE COMMUNITY DEVELOPMENT. 3.0 Semester Hrs.

Analyzes the relationship between engineering and sustainable community development (SCD) from historical, political, ethical, cultural, and practical perspectives. Students will study and analyze different dimensions of sustainability, development, and “helping”, and the role that engineering might play in each. Will include critical explorations of strengths and limitations of dominant methods in engineering problem solving, design and research for working in SCD. Through case-studies, students will analyze and evaluate projects in SCD and develop criteria for their evaluation. 3 hours lecture and discussion; 3 semester hours.
EDNS580. HUMANITARIAN ENGINEERING AND SCIENCE
CAPSTONE PRACTICUM. 3.0 Semester Hrs.
(I, II, S) This course allows students to practice the concepts, theories and methods learned in HES courses with the goal of making relevant their academic training to real world problems. This practicum can be achieved through a number of possibilities approved by HES director, including supervision and/or shadowing in HES-related activities, engaging in a social enterprise where they do problem definition, impact gap analysis and layout a business canvas, and designing and carrying out a project or fieldwork of their own, etc. Prerequisite: EDNS570, EDNS479. 3 hours research; 3 semester hours.

EDNS590. RISKS IN HUMANITARIAN ENGINEERING AND SCIENCE.
3.0 Semester Hrs.
(I) This course provides students with opportunities learn about risk and ways of analyzing engineering and scientific projects in relation to risks, and to develop multiple mitigation steps. The students will learn tools to develop their own designs while also evaluating associated risks along multiple dimensions and searching out synergies. 3 hours lecture; 3 semester hours.

EDNS598. SPECIAL TOPICS IN ENGINEERING DESIGN & SOCIETY.
6.0 Semester Hrs.
(I, II, S) Pilot course or special topics course. Topics chosen from special interests of instructor(s) and student(s). Usually the course is offered only once, but no more than twice for the same course content. Prerequisite: none. Variable credit: 0 to 6 credit hours. Repeatable for credit under different titles.

EDNS599. INDEPENDENT STUDY. 0.5-6 Semester Hr.
Individual research or special problem projects supervised by a faculty member, also, when a student and instructor agree on a subject matter, content, and credit hours. Variable credit: 0.5 to 6 credit hours. Repeatable for credit under different topics/experience and maximums vary by department. Contact the Department for credit limits toward the degree. Independent Study form must be completed and submitted to the Registrar.

EDNS479. COMMUNITY-BASED RESEARCH. 3.0 Semester Hrs.
Engineers and applied scientists face challenges that are profoundly socio-technical in nature, and communities are increasingly calling for greater participation in the decisions that affect them. Understanding the diverse perspectives of communities and being able to establish positive working relationships with their members is therefore crucial to the socially responsible practice of engineering and applied science. This course provides students with the conceptual and methodological tools to conduct community-based research. Students will learn ethnographic field methods and participatory research strategies, and critically assess the strengths and limitations of these through a final original research project. Prerequisite: HASS100. Co-requisite: HASS200.
