Space and Planetary Science and Engineering

Program Offered
Area of Special Interest in Space and Planetary Science and Engineering

Program Description
The Space and Planetary Science and Engineering Program offers an Area of Special Interest for students interested in the science, engineering, and exploration of space. This program brings together courses from several Mines departments and programs covering a diverse array of topics, including planetary science, astronomy, space physics, and the design of engineering systems for space exploration. The curriculum can be chosen from a list of approved courses, in consultation with an SPSE program advisor. Interested students should contact SPSE Program Director, Dr. Angel Abbud-Madrid, at aabbudma@mines.edu.

Since the advent of the space age in the middle of the last century, the pace of human and robotic exploration of space has been ever increasing. This exploration is made possible by feats of engineering to allow long-term operation of robotic systems and human explorers in the harsh environment of space. The product of this exploration is a large and growing body of knowledge about our neighbors in the Solar System and our place in the universe. The mission of the Space and Planetary Science and Engineering (SPSE) program is to provide students with a pathway for studying extraterrestrial applications of science, engineering, and resource utilization through an Area of Special Interest.

The Mines guidelines for Minor/ASI can be found in the Undergraduate Information section of the Mines Catalog.

Program Requirements

Area of Special Interest in Space and Planetary Science and Engineering:

Enrollment in the Area of Special Interest is approved by the Director. Students will then be assigned to an SPSE ASI advisor from among the affiliated faculty, who will monitor and advise their progress. The Area of Special Interest requires a total of 12 credits, up to 3 of which may be at the 200 level or below and up to 3 of which may overlap with the requirements of the degree-granting program. Students may choose their ASI courses from the list of approved courses below or from any additional courses approved by the students’ ASI advisor. Application of EDNS Cornerstone or Capstone project credits towards the ASI requires choice of a space or planetary related project and approval by the students’ SPSE ASI advisor.

SPSE-approved Courses

Director, SPSE Area of Special Interest
Angel Abbud-Madrid, Mechanical Engineering & Space Resources

Affiliated Faculty
Christopher Dreyer, Mechanical Engineering & Space Resources
Alex Flournoy, Physics
Leslie Lamberson, Mechanical Engineering
Derrick Rodriguez, Mechanical Engineering
Frederic Sarazin, Physics
Paul Sava, Geophysics
Matthew Siegfried, Geophysics
George Sowers, Mechanical Engineering & Space Resources Program
John Spear, Civil and Environmental Engineering
Neal Sullivan, Mechanical Engineering
Lesli Wood, Geology and Geological Engineering
