Combined Undergraduate/Graduate Degree Programs

COMBINED PROGRAM Overview

Many degree programs offer Mines undergraduate students the opportunity to begin work on a Graduate Certificate, Professional Master's Degree, Master's Degree or Doctoral Degree while completing the requirements for their Bachelor's Degree.

Combined Bachelors-Masters/Doctoral programs were created by Mines faculty for situations where they have deemed it academically advantageous to consider undergraduate and graduate degree programs as a continuous and integrated process. These are accelerated programs that are valuable in fields of engineering and applied science where advanced education in technology and/or management provides the opportunity to be on a fast track for advancement to leadership positions. Combined programs are also valuable for students who want to get a head start on their graduate education.
